

Flasks, cell culture, polystyrene, rectangular, CellBIND®

CORNING

66

- CellBIND™ surface enhances cell attachment under difficult conditions, such as reduced serum or serum-free medium, resulting in higher yields
- Certified non-pyrogenic and sterile
- Printed lot numbers for ease of traceability
- No refrigeration or special handling required, stable at room temperature

The CellBind™ surface treated flasks are manufactured from optically clear polystyrene. The CellBind™ surface enhances cell attachment.

Flasks, cell culture, polystyrene, CellBIND®, HYPERFlask™

CORNING

67

For cell culture of adherent cells.

- 10 times the cell yield from a vessel with the same external dimensions as a standard T175cm² flask
- Ten equivalent layers each containing the same CellBIND® surface area
- 1,720cm² available growth area on polystyrene, gas permeable surface

Treated for optimal cell attachment and gamma sterilised. Bar coded and compatible for use on cell culture automation platforms. Plug seal cap on a straight neck designed for filling with growth medium.
